

ACCURATOR[®] A2

Apex Locator

NEW
GENERATION
MORE THAN
ACCURATE

25 National Patents 8 Invention Patents 12 Months Warranty

- Newly upgraded algorithm makes it more stable and enables stronger anti-interference ability.
- Multi-frequency apical position technology guarantees accurate measuring even there is blood or residual pulp in the root canal.
- Measurement results will not be affected by the tooth type.

The defect of traditional measurement method

Disadvantage of handing method

Based on hand feeling and patient's pain, dentists decide whether the measuring tool reaches apical foramen, with high subjectivity and low accuracy. Foreign literature suggest that providing the range of error +0.5 mm, accuracy of handing method is only 42%.

X ray film shows under-filling

Actually it is over-filling

Disadvantage of X ray film

3D structure shooting at 2D plane, because of different angles, easily getting wrong data.

Apical foramen can't be shown in the X ray film, for over 80% apical foramens are in the side edge instead of apex.

The apical foramen is in the side edge, X ray shooting cause error length, the greater error, more serious over-filling

Key Specifications

Power Consumption	≤ 0.5W
Battery	3.7V/750mAh
Screen	4.5" LCD
Net Weight	385g
Dimension	138mm x 77mm x 107mm
Warranty	12 Months

Order Information

Code: AL2080
Model: Accurator A2
